

## Introduction

Grow your own herbs and microgreens in any kitchen with Urban Cultivator indoor gardens.

- Growing greens costs up to 80% less than buying from a supplier
- An incredible variety of difficult to source seeds are available
- Commercial unit accepts standard 10" x 20" flats of greens
- Bring a spotlight to your commitment to fresh food and the environment
- Many restaurants gain free publicity after installing a unit from local media and food bloggers
- Growing greens produces less CO<sub>2</sub> emissions than traditionally grown greens

An Urban Cultivator indoor garden is perfect for:

- Restaurants and bistros
- Deli and sandwich shops
- Chefs looking to stand out with a unique angle
- Growing difficult to source greens

*\*Residential model shown with optional cutting board top*
